Dear Homeowner/Resident,

This letter is to give you advance notice of essential road reconstruction, surfacing and footway improvement works on Poethlyn Drive, Kestrel Avenue and Fairway.

The works are planned Highway Adoption works that will bring the existing infrastructure up to Norfolk County Council (NCC) adoptable standard. We have now completed mobilisation activities including interface inspections with NCC.

These works will not require day time closures and are programmed to start week commencing 2nd October 2017. They will take up to 14 weeks to complete, and will start at 8am each morning and will cease at 5pm each day, Monday to Friday for the contract duration.

Please note that these works could be affected by weather conditions, as bad weather may delay work. There will be temporary disruption for pedestrians and there will be a degree of noise during some of the construction activities.

To ensure the safety of residents, pedestrians and our operatives during the excavation, resurfacing and footway marking phases, as well as to allow time for materials to cure, please consider leaving your vehicle outside the working area if you wish to use it during the works period. If returning by car when the road closure is in operation, you may be asked to park elsewhere as access to your property may be restricted temporarily.

We would ask local residents/homeowners to refrain from parking your vehicle on the highway whilst the works are being undertaken. This is to allow access for emergency service vehicles and to help with the flow of traffic around the works location.

We will try to accommodate pedestrian access by residents when possible during the road closure; however it will not be possible to permit pedestrian access through the working area at certain times.

Noisy works will at all times be minimised, planned and always in accordance with Council guidelines which are 8.00am to 5.00pm Monday to Friday.

During the above works, should you have any queries or concerns please contact a member of the project team below.

Thank you for your co-operation and patience.

Yours faithfully,

EJ Taylor & Sons Ltd
